

### WHY VELUSJET®

- Intuitive operation and perfectly designed themed massages
- High massage frequency with low personnel costs
- Low operating costs, energy-efficient components + programmable heating times
- Intelligent temperature management for continuous use without permanent water connection
- Unique 2 pump technology

### VELUSJET® IN USE

- Lower personnel costs than with a normal massage
- Prospect and customer acquisition
- Expansion of the services

### WHAT ADVANTAGES YOU HAVE AS A USER OF A HYDROJET

Muscle tension, muscular imbalances, stress-related tension as well as back and joint pain are frequent and often chronic symptoms in people.

The VELUSJET® is used as a class IIa medical device in clinics, orthopedic practices, physiotherapy practices and rehabilitation facilities in the field of prevention or therapy. Also in the field of wellness there are many branches who work with VELUSJET®. The massage pressure of this overwater massage of the VELUSJET® of 7.4 bar allows an effective treatment of various indicators.

The VELUSJET® can be used as preparation for therapeutic measures such as extension, manual therapy or physiotherapy.
